FEATURES

24 PUTTING UTAH ON A PETROLEUM MAP

Since the 1890s, companies have been exploring and producing petroleum in Utah, to varied levels of success. Though oil production has waned in recent years, a renaissance may be underway thanks to the 2003 discovery of a new oilfield in central Utah.

Rasoul Sorkhabi

30 INTEGRATING BIOFUELS INTO THE FUEL SUPPLY

Chevron, one of the biggest oil companies in the United States, is expanding its energy portfolio by enhancing research on biofuels.

Rick Zalesky

34 DIGGING DEEP IN THE GULF OF MEXICO

The offshore region is possibly the last unexplored frontier in oil production, especially in the United States. But with new technologies, energy companies are increasingly finding new oilfields.
